Bethesda's Upcoming Fallout 76 Livestreams

"Starting soon," Bethesda said; "our Community team is going to start livestreaming Fallout 76 on Twitch and Mixer. We'd like to start working to answer more of your questions in real-time while also having fun hanging out with you. We'll be curating these streams based on what you'd like to know, as well as using them as opportunities to chat more directly with you while we share in our excitement for new content, quests, events, and more throughout this year, and beyond."
